

# Music Production & Engineering

## Project 6 – BACKBEATS

This project will have you explore Soundtrap and its ability to create Beats & Loops for song/music construction. You will be creating a music composition/project that will consist of THREE different SYNTH & DRUM loops.

### Project Steps:

1. Watch these short videos on loop construction:

[Video 1: Beats & Bars](#)

[Video 2: Edit Your Beats](#)

[Video 3: Using the Loop Tab](#)

[\\*Project 6 – Backbeats Quick Tutorial\\*](#)

2. You will create THREE different "Backbeats" on Soundtrap.

3. Click the SOUNDTRAP PROJECT LINK FROM GOOGLE CLASSROOM.

4. Once the project is open, rename the project by adding your last name to the title and click save.

5. Use the loop tab on the right to explore the 100's of different loops that Soundtrap has.
